Historical Summary of Enrollments (Fall 1988-90)
and Completions (AY1987/88-AY1989/90)
RPEDS Data Tables

Office of Research, Information Systems and Assessment
July 19, 1991

Historical Summary of Enrollments (Fall 1988-90)
and Completions (AY1987/88-AY1989/90)
RPEDS Data Tables

There are five sets of tables. The first four sets present the Fall 1988 through Fall 1990 Headcount and Full-Time Equivalent Enrollment data. The fifth set (Appendix 5) presents the Completions data from Academic Year 1987/1988 to Academic Year 1989/1990.

Each of the enrollment sets present the data differently: Day and DCE nonduplicated headcount frequencies (Appendix 1); Full-Time Equivalent frequencies (Appendix 2); percentage of headcount that is state-supported (Appendix 3) and ratio of FTE to headcount (Appendix 4). Each table has the following data sections: race, gender, grade level, full or part-time status, residence, admission status, transfer status, age and program area. Each table also compares Fall 1988 with Fall 1989, Fall 1989 with Fall 1990 and Fall 1988 with Fall 1990.

Each completions table has the following data sections: race, gender, type of award, age and program area. Each table also compares Academic Year 1987/1988 with Academic Year 1988/1989, Academic Year 1988/1990 with Academic Year 1989/1990 and Academic Year 1987/1988 with Academic Year 1989/1990.

The enrollment figures are derived from the individual student records in the Research and Planning, Enrollment and Degrees System (RPEDS). The public colleges and universities submit the student enrollment records to the Board of Regents every fall and spring.

In 1988, two state colleges were unable to provide DCE credit information. Their DCE enrollments are not reported and noted as (b) and the system and state college totals are estimated. Also, two campuses stated that the information they provided for that year was not completely accurate. In 1989, one campus stated that the information it provided was not completely accurate. In 1990, one state college was unable to provide any data. Its figures are not reported and noted as (a) and the system and state college totals are estimated.

In 1990, Day and DCE headcounts and FTEs derived from course information were reported for the first time. Previously, headcount and FTE figures were based on the division (Day or DCE) in which the student was identified rather than by type of course enrolled. Because of this definitional difference, there may be some switches in figures between Day and DCE divisions compared to 1988 and 1989.

Two campuses in 1990 were unable to provide complete course data. For these two campuses, the same procedure for reporting

Day and DCE headcounts and FTE is used as was used in 1988 and 1989.

The completions tables have been generated from the individual completion records submitted by the campuses for the previous academic year. It should be noted that individual students can receive more than one degree or certificate during an academic year. As a result, the total number of completions exceeds the total number of completers.

The database includes teaching certification which is not an award or a degree but a 'completion'. When students complete a teaching program they receive a certificate from the state, not the campus. Since the campus program meets the certificate requirements, the RPEDS database counts the teaching certificate as part of the campus' completions.

Some of the tables contain percent changes noted as (c). This note is used to refer to changes greater than 1000% and changes beginning from zero.

The sets of tables are available on the Micro Vax in folder Lib1:RPEDS. The document names are:

- History 1 - Headcount
- History 2 - F.T.E.
- History 3 - Pct. Day
- History 4 - F.T.E./Headcount
- History 5 - Degrees Conferred
